PROFILE

Junior Front-End Developer with a strong foundation in React, a background as a Project Administrator, and extensive online training in front-end development. Skilled in responsive design, component architecture, and modern JavaScript, creating user-focused, visually engaging applications. Known for adaptability and a quick learning curve, ready to bring creativity and precision to a collaborative team.

PROJECTS

Jammming 🔗

- Jammming is a React web application I developed that uses the Spotify API to offer users the ability to search the Spotify library, create custom playlists, and save these playlists directly to their Spotify account.
- <https://evdmjammmingapp.netlify.app/> 🔗

ReadIt-Hub 🔗

- ReadIt-Hub is a simplified version of Reddit designed as a read-only platform.
- This web application was built using the Reddit API snoowrap and integrated with Redux for state management.
- <https://readit-hub.netlify.app/> 🔗

PROFESSIONAL EXPERIENCE

Project Administrator (Data Related),

Petros Business Solutions

Sep 2021 – May 2023 | Centurion

- Provided support to project managers in data-related tasks, including quality assurance, document management, and system testing.
- Assisted in building and maintaining organizational structures within the system.
- Contributed to the development of project scopes for new features.
